

INDEX

<u>Chapter 1 - Introduction and Project Background</u>	<u>PAGE</u>
Introduction	1
Project Background & History	1-5
Why the Project is Taking Place	5-6
Existing Water Quality Conditions and Problems	6-7
Seven Mile Creek Watershed Project	7-10
Statement of Project Goals & Outcomes	10-12
Project Organization & Responsibilities	12-13
Milestone Schedule	13-15
<u>Chapter 2 - Project Area Description</u>	
General Summary	16-20
Unique Watershed Features	20-21
Topography	21-25
Climate	26-32
Land Use	33-35
Soils	36-47
Wetlands	47-49
Drainage	50
Permitted Feedlots	51-54
Northern Plains Dairy	55-57
Septic Systems	58-59
Lakes	60
Population	60-61
Rare Natural Features/Endangered Species	60
<u>Chapter 3 - Approach and Methods</u>	
Water Quality Monitoring	62-76
<u>Chapter 4 - Watershed Assessments and Techniques</u>	
Watershed Assessments	77
Tillage Transect Survey	78-80
Watershed Modeling Techniques	81
Predicting Rainfall Erosion Losses - Revised Universal Soil Loss Equation (RUSLE)	81-83
Advanced Sediment and Phosphorus Transport Modeling using RUSLE and Loading Rates	83
Slopes, Elevations, Hill Shading	83
Biological - Historical Fishery Assessment - MN DNR	84-87

Chapter 5 - Results & Discussion

Water Quality Monitoring	88-98
Hydrology	99-107
Pollutant Loading Estimates	107
FLUX - Flow Weighted Mean Concentrations and Yields	
Relative Water Quality in the Watershed for 1999 Monitoring Season	107-113
Loading Rates vs. Monitoring Year	114-116
2000 Watershed Comparisons	116-120
TSS vs. Transparency Tube Readings	120-121
2001 Conservation Tillage Survey Results	121-125
2001 Watershed Inventories and Open Tile Intake Survey Results	126

Chapter 6 - Sediment and Nutrient Modeling

Sediment and Phosphorus	129-147
-------------------------	---------

Chapter 7 - Conclusions & Goals

Seven Mile Creek Diagnostic Study	148-151
Total Maximum Daily Loads	152-154
Watershed Water Quality Goals	154-159

Chapter 8 - Implementation Plan

Introduction	160-162
Watershed Partners	162-163
Implementation Plan Stakeholders	163-164
Best Management Practices	164
Implementation Plan Structure	165-168
BMP 1. Nutrient Management-CAP Project	168-173
BMP 2. USDA and University of Minnesota Paired Watershed Study	173
BMP 3. Red Top Farms - Cover Crops such as Rye for de-nitrification purposes	174-175
BMP 4. McKnight Foundation Grant Proposal-Denitrification, Bank erosion restoration and water storage	175-178
BMP 5. Riparian Buffer Strips and Set-aside Programs	178-179
BMP 6. SMC Filter Strip	179
BMP 7. Grassed Waterways	180
BMP 8. Rock Inlets and other Tile Intake Alternatives	180-181
BMP 9. Livestock and Feedlot Waste Management	181-182
BMP 10. Residue Management	182
BMP 11. Individual Sewage Treatment Systems (Septic Systems)	182-183
BMP 12. Streambank Restoration	183-184
Seven Mile Creek Implementation Plan - Cash Expenditures	184
Seven Mile Creek Implementation Plan - In-Kind Contributions	185
Seven Mile Creek Budget	186-188
Seven Mile Creek Watershed Project Milestone Schedule	189
